IS YOUR SHOWERHEAD EFFICIENT?

ABOUT 20% OF WATER USED INDOORS IS FOR SHOWERING! SAVE WATER AND ENERGY BY REPLACING YOUR OLD SHOWERHEADS WITH HIGH-EFFICIENCY ONES, IT'S FREE, IT'S EASY, IT'S FUN!

Follow these simple steps to see if you need new showerheads. Remember to check with an adult before starting.

- STEP 1: Get a bucket, a stopwatch and a measuring cup.
- STEP 2: Turn on the shower to its full flow.
- STEP 3: Catch all of the water coming out of the shower in your bucket for 15 seconds.
- STEP 4: Pour the water from the bucket into the measuring cup.
 - If you collected **more** than 8 cups of water in 15 seconds, you should replace your showerhead.
 - If you collected **less** than 8 cups of water in 15 seconds, congratulations! Your showerhead is already efficient and you don't need a new one.
